

Master Resume

Professional Summary

Early-career Data/Business Analyst with a background in [Degree]. Skilled in SQL, Excel, and data visualization. Interested in using clean, well-documented data to support clear decisions.

Core Skills

- SQL (joins, CTEs, window functions)
- Excel (PivotTables, Power Query)
- Python (pandas)
- Tableau (dashboards, KPI reporting)
- Data cleaning and quality assurance
- Requirements gathering
- Stakeholder communication
- Process documentation and handoffs

Experience

Data Analyst Intern, [Company] — [City, State]

[Start Month YYYY] – [End Month YYYY]

- Built a weekly KPI dashboard using Tableau and SQL, reducing ad-hoc reporting requests by 25% and improving refresh cadence from weekly to daily.
- Cleaned and standardized 50,000+ CRM records (deduplication and validation rules), improving match accuracy by 18% and reducing manual cleanup time by 2 hours per week.

Projects

Sales Dashboard (Tableau) — [Month YYYY]

- Built a sales dashboard in Tableau that reduced reporting time by 40% through standardized KPIs and reusable views.

Customer Churn Analysis (SQL, Python) — [Month YYYY]

- Cleaned and analyzed a 50,000-row dataset to identify churn drivers and present recommendations.

Automated Weekly Reporting (Excel) — [Month YYYY]

- Automated a weekly Excel report, saving approximately 3 hours per week.

Education

[Degree], [Major] — [University], [City, State]

[Graduation Month YYYY]
